

# Secondary CITIES

## Kharkiv Workshop – May 2016

# Data Collection Features & Attributes

# Three Feature Categories

- 1) **Mobility**: Infrastructure features that contribute to the mobility of vulnerable populations in the urban environment
- 2) **Community Resources**: Resources and services that align with integral needs of identified vulnerable populations (e.g. housing, healthcare, employment, education)
- 3) **Public Safety**: Infrastructure features and community services that contribute to the safety of vulnerable populations in the urban environment

# Mobility Features & Attributes

## 1) Street Intersections

Do they have curb cuts or ramps for pedestrian access?

## 2) Stairs

How many stairs? What is the surface? Is there a handrail?

## 3) Subway Station Entrances

How accessible are these? (ramps or stairs?)

# Community Resource Features & Attributes

- 1) Healthcare Facilities
- 2) Housing Resources
- 3) Childcare Resources
- 4) Employment Resources
- 5) Social Service Organization & General Community Services *(pension fund branches, banks, government offices, food markets, post offices)*

# Public Safety Features & Attributes

## 1) Streetlights / Lamp Posts
